

HOW TO DISABLE FLASH

Google Chrome

1. Click the three dots in the top right of the window '⋮'.
2. Click: Settings>Advanced>Privacy and Security>Content Settings>Flash.
3. If any Rangers.co.uk pages are in the allow list,
 - Delete these.
4. Add 'rangers.co.uk' to the block list.
5. Try Live Video again.
6. If unsuccessful on the same page turn off 'Allow sites to run flash'
7. Try Live Video again.

Mozilla Firefox

1. Open Firefox and click on main menu in the top right of the window '☰'.
2. In the menu, click on "Add-ons".
3. On the next page, you will see an option of "Plugins" in the left panel, click on it.
4. Now, click on the drop down menu on the plugin "Shockwave Flash" and select "Never Activate". This will disable the flash player.
5. Try Live Video again.

Microsoft Edge/Internet Explorer

1. Open Internet Explorer, and click on "Tools" located at the top right corner of the window.
2. From the menu, click on "Manage Add-ons".
3. There you will find a drop down menu under heading "Show" located in the left panel. Select "All add-ons" from the drop down menu.
4. Now, click on "Shockwave Flash Object" located under the heading "Adobe System Incorporated", and click on "Disable" at the bottom right corner of the window.
5. Try Live Video again.

Safari

1. Open Safari, and click on "Gear" icon on the top left corner to open menu, and from the menu, click on "Preferences".
2. Here, navigate to the "Security" tab and uncheck the option "Enable-plugins". This will disable the flash player in Safari.
3. Try Live Video again.

Opera

1. Open Opera and type "about:plugins" in the search bar and hit enter.
2. On the next page, click on "Disable" under the plugin "Adobe Flash Player" to disable flash player.
3. Try Live Video again.
